SUMMARY

Software engineer, 5 years in React Native and TypeScript — currently rebuilding a fintech app used in 100+ countries. I also tend to own the parts next to the feature: a company's first end-to-end test suite and CI monitoring, Expo release pipelines, and n8n agent workflows. Comfortable across mobile, backend (Node/NestJS) and CI, and I use AI coding tools heavily enough that work which used to take weeks lands in days.

EXPERIENCE

Mobile Software Engineer — LaunchGood

Aug 2025 – Present · Remote, US

- Rebuilt core screens of a React Native app serving 100+ countries as part of an app-wide facelift — shipping each feature end to end across API integration, state, UI and Jest component tests.
- Integrated Claude via MCP into the team's workflow for design handoff and test authoring.
- Ran coding agents through feature work on a spec → generate → diff-review → test loop, catching device-specific edge cases the generated output missed.

QA Automation Engineer — LaunchGood

Feb 2025 – Aug 2025 · Remote, US

- Built the company's first Playwright end-to-end suite from scratch, with reusable page-object helpers other engineers extended.
- Put it on a five-minute GitHub Actions cron as synthetic monitoring, with Slack webhook alerts on failure.
- Brought detection of production breakages down from hours to under five minutes.

Full-Stack Mobile Engineer — Freelance

Aug 2024 – Feb 2025 · Remote

- Developed a mobile app integrated with the OpenAI API for AI-driven user features.
- Built a full-stack web platform with Next.js, Supabase, tRPC and Prisma, and an e-commerce site on the Shopify Headless Storefront API.

Full-Stack Mobile Engineer — Aurem

Dec 2022 – Aug 2024 · Abu Dhabi, UAE

- Migrated the frontend from Chakra UI to Tailwind CSS, cutting styling time by 30% and standardizing the component layer.
- Automated Expo builds with GitHub Actions, saving 7 hours of manual release effort weekly.
- Designed and implemented NestJS backend APIs — data models, entities and queries — behind the app's core flows.

Frontend Engineer — HCL Technologies

Jan 2022 – Dec 2022 · Warsaw, Poland

- Built micro-frontends with Single-SPA for the "My Account" area of a platform serving 2M+ users, working inside a shared shell across multiple teams; started a recurring peer knowledge-sharing session for the frontend team.

Full-Stack Engineer Intern — proceedit

Jul 2021 – Jan 2022 · Barcelona, Spain

- Migrated the company site from WordPress to AWS and built a Flutter web front end for cross-platform reach.

PROJECTS

Nidham (نظام) — agentic mobile planner for Muslims with ADHD

2026

- Built the MVP end to end in a 48-hour window: a React Native + Expo (TypeScript) client with Supabase auth and sync, and an n8n backend routing each plain-language brain-dump through three agents — capture, Tavily-backed research, and a scheduler that works around the five daily prayer times.
- Kept the planning logic in the workflow rather than the client, so agent changes ship without an app release, and normalized the agents' inconsistent output shapes so the UI renders reliably. Case study: try.ka.nz/ai/aminatmoldalieva

AI Interview Coach — real-time avatar interviewer (prototype)

2026

- Prototyped a voice-driven mock interviewer: configured an ElevenLabs conversational agent and wired it to a HeyGen LiveAvatar over LiveKit, so the agent's audio drives a lip-synced video interviewer that answers in real time. Working end-to-end demo.

SKILLS

AI & Agents: LLM APIs (Claude, OpenAI), Model Context Protocol (MCP), n8n agent orchestration, multi-agent routing, system prompt design, Tavily, ElevenLabs conversational agents, HeyGen LiveAvatar / LiveKit, AI coding agents (Claude Code)

Mobile: React Native, Expo, Flutter

Frontend: TypeScript, JavaScript, React, Next.js, Tailwind CSS, Single-SPA

Backend: Node.js, NestJS, tRPC, Prisma, Supabase, REST APIs, SQL

Testing & CI: Playwright, Jest, GitHub Actions, synthetic monitoring, AWS

EDUCATION

B.Eng., Computer Engineering — Vistula University, Warsaw, Poland

[grad year]

Languages: English, Russian, Kyrgyz, Turkish, Polish
